

For perfect sweeping and scrubbing results

Combi 400

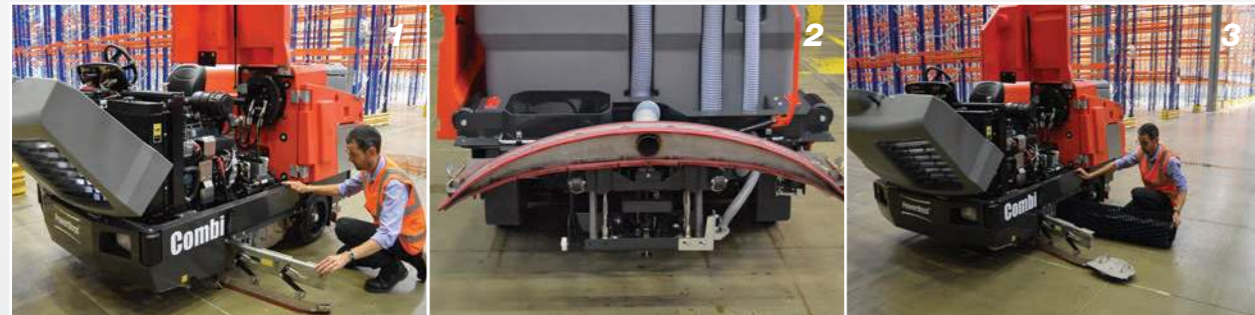

Read & React Maneuverability

The operator can turn around in a 274cm aisle if needed without having to back up or turn off the water or brushes while scrubbing. The operator can read the traffic and react safely.

Heavy duty stainless steel components

Scrub deck, scrub deck doors, scrub door hinges, side squeegee frame, rear squeegee frame, all squeegee attachment bands (inner, outer and sides), debris hopper (optional stainless steel).

Superior Maintenance Positions

The engine panels can be removed without tools. This provides 360 degree accessibility. This allows for easy and efficient maintenance of the machine.

Quick View Squeegee

The squeegee assembly lifts, allowing quick adjustments and changes to be made. This also enables easy daily inspection and debris removal.

Quick Change Scrub Brushes

No tools are required for scrub brush inspection or changes.

Optional Equipment

- Side scrub
- Overhead guard
- Safety light packages
- Suspension seat
- Safety belt
- Canvas cab mounted on overhead guard
- Back up alarm
- Chemical metering
- Fire extinguisher
- Auto fill
- Heated solution
- Spray and Vac wand
- Spare LP tank holder

Combi 400

Quick Guide

Performance

When perfect results are expected,
you need high performance machines

Top performance at all times

The Combi 400 scrubber sweeper will provide exceptional value for your company. Large water capacities provide longer run times, heavy duty stainless steel parts offer lower cost of ownership and the unrivalled maneuverability helps to ensure professional cleaning results that will make the difference for your facility.

Suitable Applications:

- Distribution centres
- Car parks
- Manufacturing facilities
- Ports and terminals
- Municipalities
- Large shopping centres
- Warehousing

Powerful Systems provide powerful performance:

- Kubota engines
- Eaton hydraulic motors
- Parker TC Hoses
- Monarch traction tyres
- Linatex extended wear, oil resistant squeegees
- 11,500 RPM hydraulic vacuum – dry floors immediately
- Parker O-Ring face seal hydraulic fittings

A) Quick Scrub Controls

One switch operation, simple to use.

B) Max Access Panel

Easy access to electronic systems, hydraulic manifold, steering assembly, Kubota engine, radiator and hydraulic oil cooler.

C) Side Scrub

Optional 41cm disc scrub brush for cleaning against the walls of close to racking.

D) Front Steer and Drive Traction Tyre

Provides excellent turning and confident operation.

E) Powerful 114cm Cylindrical Scrub

Sweep brushes powered by hydraulic motors provide exceptional cleaning performance.

F) 85 litre Quick Load Hopper

Complete with optional plastic easy dump debris trays for ergonomic disposal or optional stainless steel one piece hopper.

G) Quick View Squeegee

The squeegee assembly lifts easily, allowing quick adjustments and changes to be made. This also allows easy daily maintenance.

H) PRO Scrub

Prolonged Runtime Operation. Large solution and recovery tanks with up to 2 hours of scrub time.

1) Quick Scrub – Controls

The operator can turn on and off the scrub function with the simple flick of one switch. The scrub and/or vacuum function are selected prior to cleaning and initiated through the use of the green quick Scrubmaster switch. These functions can also be adjusted during the cleaning process.

2) Outstanding Cleaning Results

The combination of powerful hydraulic brush drive and vacuum motors, along with multiple pressure settings, allows outstanding debris collection and water pick up leaving the floor dry enough for forklift and foot traffic immediately behind the machine.

3) Pro Scrub

Extended scrub time before draining and refilling is required, maximising operator efficiency.

4) Easy Clean Recovery Tank

A large drain hose provides quick and clean draining of the dirty water. Two large doors at the top of the tank and one 20cm drain cap provide easy access for washing the recovery tank free of sediment.

5) Quick load hopper with Easy Roll Casters and Safety Dump debris tray

The squeegee is tilted up out of the way so the debris hopper can be removed from the machine. Now the hopper can be moved effortlessly using the Easy Roll Casters and the debris can be disposed of safely and easily using the plastic Safety Dump debris trays.
